

If you are interested in growing marijuana under artificial light, then this is the book for you. It contains all the necessary information for amateur and professional growers. It doesn't matter whether you are a complete novice or a veteran grower – inside this book you are guaranteed to find useful and interesting information which I have gained during more than twenty years of growing cannabis, as well as from other experts around the world. Inside you will find:

- Basic information on cannabis.
- How to set up a grow room according to your desires and needs.
- Detailed information on state-of-the-art lighting, irrigation, ventilation and grow systems.
- How to grow from seed to harvest, including auto-flowering strains.
- Which problems can arise and how to solve them.

In addition, you will read about a number of techniques and methods on how to improve your harvests and how to grow organically. In this completely revised and up-to-date edition of my book, everything is written in a clear and understandable manner.
